Description

3M™ PELTOR™ SportTac™ Active Hearing Protector

Purpose-built for **hunters and sport shooters**, the SportTac headset combines rugged mechanics with smart electronics that *instantly attenuate* harmful gunshot noise while amplifying safe ambient sounds such as conversation and game movement.

Key Advantages

- **Level-Dependent (Active) Protection** - Microphones sample the environment 1,000x/s.
Loud impulse noise is cut in <1 ms, while quiet sounds are boosted up to 10 x.
- **True Directional Hearing** - Dual microphones keep sound localization natural, so you still hear *where* a call or rustle comes from.
- **Long-life Electronics** - ~ 600 h run time on two common AAA batteries with auto shut-off after 4 h of inactivity.
- **Fold-Flat Design** - Collapsible stainless headband fits in a range bag or cargo pocket.
- **Interchangeable Cup Shells** - Two colour sets included (olive/orange)

Glossary

Level-dependent function: also called “*electronic ear muffs*”. The headset uses microphones & speakers to pass through quiet sounds while shutting off dangerous peaks above 82-85 dB.

Attenuation (dB): the reduction in sound pressure level that reaches your ear. Every 3 dB is roughly a halving of sound energy.
