Extreme water and dirt
proofing and repellent coating
for all natural and synthetic
fabrics.

1-4 Weeks

Description

The permanent impregnation penetrates the fabric and thereby impregnates the clothing permanently. After just one treatment, the water rolls off the material. It is suitable for all washable fabrics, protects down and all insulating materials. Only one application is required, then the impregnation lasts up to 24 washes. One bottle impregnates two to four items of clothing. The fabric remains soft and breathable, is not additionally stressed when wet and dries odorless. It does more than wax, long-chain polymers and silicone. It does not contain ultraviolet brighteners, which prevents the material from yellowing. Impregnation is recommended for all breathable systems and functional membranes. It is not flammable and contains no solvents. The impregnation is CFC-free, contains only three grams of CO2 and is therefore very environmentally friendly. It can also be used to protect wood, stone and concrete. Applied to rain roofs, umbrellas, awnings and garden furniture, it optimizes their rain resistance and noticeably extends their lifespan.

Recommended for nylon, cotton, outdoor textiles, breathable fabrics such as
