Description

Newest generation of the RACCON backpack incorporates our experiences with this model. Lightweight, yet sturdy pack of 20 Liter capacity is an optimal choice for everyday use, yet it is absolutely enough for day hikes and tactical ops, where a larger pack would be an unnecessary burden.

RACCOON Mk2 is also equipped with one external pocket, similar in size to the main compartment. It contains a simple organizer for carrying additional items. For heavy loads the simple, webbing hip belt distributes weight properly. The backpack covered with webbing compatible with MOLLE/PALS system. Shockcord allows attachment of additional equipment like jackets, sleeping mat etc.

Features:

- All compartments close with YKK® zippers
- Large external organizer poczet for maps, pens, lights etc
- Mesh pocket for smaller items in main compartment
- Side compression straps and removable belt webbing
- Spacer mesh on back panel and suspenders, enhancing airflow
