Description

BikeSilex is used to lubricate, protect and preserve bicycle parts made of rubber, plastic and metal. For suspension forks, pistons, dampers and joints. The seals also remain supple. Bikesilex protects against moisture, restores the natural appearance of plastic, prevents parts from drying out and becoming brittle and eliminates any squeaking and creaking sounds. It adheres very strongly and durably to surfaces and is also extremely high yielding due to its high silicon proportion. Its material compatibility with all components has been tested.

Made in Germany.

Danger:

Extremely flammable aerosol. Container is under pressure: may burst if heated. Causes skin irritation. May cause drowsiness and dizziness. Toxic to aquatic life with long lasting effects. Keep out of the reach of children. Keep away from heat, hot surfaces, sparks, open flames and other
