Description

Berghaus FLT Pockets, Set of 2, IR Stone Grey Olive

The **Berghaus FLT Pockets** are designed to offer maximum flexibility in your load-carrying system. Available in three sizes - Small, Medium, and Large - these versatile side pockets fit seamlessly on any FLT rucksack, either at the sides or the front, using the ACH attachment system. The durable **Cordura 560 dtex** fabric ensures that the FLT Pockets withstand harsh conditions while maintaining a lightweight and compact profile. Additionally, the pockets provide protection against infrared (IR) detection, reducing visibility to night vision devices, making them ideal for tactical missions requiring stealth.

Key Features:

- **Infrared Protection:** The IR Stone Grey Olive fabric is engineered to minimize the reflection of infrared light, which significantly reduces the chance of detection by night vision devices. This feature is crucial for military and tactical operations where remaining undetected in low-light or night-time environments is essential. The IR protection ensures that the gear blends into the surroundings not only visually but also in the infrared spectrum, making these pockets highly suitable for stealth operations.
- **Versatile Attachment:** Can be attached to the sides or front of any FLT rucksack using the ACH applications, giving you a customizable load-carrying setup.
