Description

Treat narrow penetrating injuries fast with the power of Celox Granules in a pre-filled applicator.

Penetrating injuries such as blast or knife wounds are very difficult to treat and often lethal. Celox™-A is a unique haemostatic granule applicator pre-packed with 6g of Celox™ granules and designed to get through a small entry wound, directly to the bleeding site in just a few seconds.

Features

- Unique high speed applicator
- Treats narrow wounds
- Bullet, blast fragments and stab injuries
- Gets to the source of the bleeding

Celox-A has excellent results in independent testing outperforming Combat Gauze. Celox-A uses the proven Celox granules for maximum performance and reassurance of a safe, effective product.

Not indicated for junctional wounds not amenable to pressure

* The bleeding site must be visualized prior to application of Celox
