## Description

### Drop Forged Tomahawks

Cold Steel®'s high-quality tomahawks are precision drop-forged from 1055 high carbon steel. The drop-forging process offers many distinct advantages for the production of impact tools, particularly ones that require a cutting edge. By using a series of progressive dies affixed to high-powered hammers, the steel is kneaded and compressed into a completely homogenous mass, creating a very uniform grain structure and minimizing imperfections. All Cold Steel® Tomahawks are also differentially heat-treated, with a cutting edge and hammer face that is fully hardened to take a keen edge, while the body of the blade is kept soft to absorb the shock and impact of striking blows. The American Tomahawk Company® is a registered trademark and a division of Cold Steel®, Inc.

### Frontier Hawk, Flat Textured Finish

Suitable for re-enactors from any period stretching from the French and Indian War clear up to the final settling of the West in the late 1800's, the Frontier Hawk is a joy to use! It's as light as some camp hatchets, but its design allows for a vast amount of cutting potential!
