Description

Wool trekking socks from the **MERINO EVERYDAY WOOL** line, designed for trekking and everyday use.

They provide **excellent thermal insulation**, protecting the feet from the cold, but also from excessive overheating.

They regulate air circulation and **limit the growth of bacteria** responsible for the formation of **unpleasant odors**.

Five specially designed zones increase the comfort of use and ensure comfort.

They stabilize the sock on the foot, **protect against abrasion and impact**, and reduce the pressure exerted by footwear on the foot.

Comodo socks will prove themselves during **hiking trips as well as everyday use**.

Main advantages:

- 40% merino wool
- excellent thermal insulation
- thermoactive properties
- antibacterial
- protect feet from abrasions and chafing

5 special zones increasing wearing comfort :

- **pressure zone** - distributes the load, reduces friction
- **reinforcement zone** - cushions and protects the instep of the foot
- **shape zone** - adjusts the sock to the foot
- **flattened seam zone** - protects fingers from abrasions
- **control zone** - prevents the sock from slipping

Fabrics: 40% Merino Wool, 40% Acrylic, 15% Polyamide, 5% Elastane

Use: All season, everyday

Merino Wool - natural wool of the highest quality, obtained from Merino sheep. Merino yarn is characterized by exceptional softness, thanks to which it provides a high level of comfort.

Features: Merino wool provides great thermal insulation; on a hot summer it cools the skin and warms it during cold winters. And this is because a lot of air is trapped in the structure of the wool fiber. Regardless of the type of physical activity, wool insulates and regulates temperature. It allows you to keep warm in the cold and cool in the heat, and at the same time removes moisture, leaving the skin dry for longer.

Benefits: Merino wool perfectly separates moisture from the skin - its hygroscopicity is the highest among all fibers. Very popular for the production of socks and outdoor clothing as it is known for its high quality and durability. Thanks to self-cleaning scales located on the surface of the fibers - merino wool significantly reduces the unpleasant smell that arises as a result of sweat deposition. In addition, it maintains an environment hostile to bacteria. Hence, it is also valued in the production of children's clothing. In addition, merino wool is characterized by very high softness and fluffiness, and its fibers are extremely thin and elastic.

Made in Poland.
