Description

Dutrition Aquaprove Water Purification Solution

Aquaprove water purification is the solution for ensuring clean and fresh drinking water when out on treks and expeditions. The Aquaprove kit includes a 50ml bottle that needs to be filled with water and one Aquaprove tablet for preparing the purification solution.

One Aquaprove kit purifies up to 250 litres of water.

Preparing for Use of Aquaprove Water Purification:

1. Remove the cap and fill the enclosed bottle with water up to the blue arrow mark.
2. Add the Aquaprove tablet to the water in the bottle.
3. Replace the cap on the bottle and close firmly.
4. Do not move or shake the bottle, allow 10 minutes for the solution to be ready.
5. Gently shake the bottle to achieve proper mixing of the AquaProve solution.
6. Aquaprove (0.2% aqueous chlorine dioxide solution) is ready for use.

How to Use When Purifying Your Drinking Water:

ORDER CONFIRMATION

- Add 4 drops of the Aquaprove solution to every 1 litre of water.
- If the water source is unreliable, increase the dose to up to 8 drops per litre of water.
- Your purified water is ready for use in 5 minutes.

Why We Love Aquaprove Water Purification:

It's our go-to water purification method because it's easy to use, quick to work, ensures safe drinking water, and is lightweight for the volume of water it purifies.

Additional Information:

„Aquaprove” is a compact water disinfectant designed to purify water from various natural microorganisms. It is space-saving and easy to use. Not only does it purify and disinfect water, but it also makes it fresher, tastier, and clearer. The active ingredient in „Aquaprove” solution is chlorine dioxide.

Why Choose „Aquaprove”?

- „Aquaprove” has a wealth of international usage experience and can be used for both small and large volumes of water. Its packaging is convenient for storage and transportation.
- **Effectiveness:** Destroys viruses and harmful bacteria (including E. coli, Salmonella, Giardia, Staphylococcus, Listeria, Legionella).
- **Long Shelf Life:** The product has a shelf life of 3 years in a closed package, and the prepared chlorine dioxide solution can be stored for up to 30 days.
- Certified to meet the „NSF/ANSI Standard 60” for drinking water disinfection.

„Aquaprove” is a modern, environmentally friendly technology that is safe for humans and animals. It is widely used for water and surface disinfection.

Made in Netherlands.
