### Care and Maintenance

- Use only on unloaded firearms and disassembled parts.
- Store the aerosol upright, in a cool, ventilated place.
- Do not store near open flames, sparks or hot surfaces.
- Wash hands thoroughly after use.
- Avoid release to the environment and do not allow product to reach waterways.

### Other Useful Information

SchleTek Carbon Cleaner is particularly useful for shooters who regularly fire black powder or high round-count nitro loads, where ordinary cleaners are no longer sufficient. By softening baked-on deposits, it helps restore barrel cleanliness and saves considerable manual effort.

### Glossary of Terms

- **Carbon residue:** Burnt powder deposits that accumulate inside firearm barrels and components.
- **Black powder:** Traditional propellant used in historical firearms and some sport disciplines.
- **Nitro powder:** Modern smokeless powder used in contemporary ammunition.
- **CLP/GHS:** Classification, Labelling and Packaging / Globally Harmonised System for hazardous chemicals.
- **Flammable aerosol:** Pressurised product capable of forming flammable mixtures with air.

### Downloads, Manuals, Certificates

- CLP and safety information as listed above.
- Further documents available on request from the manufacturer or distributor.
