Total length	24.5 cm
Blade length	13.5 cm
Blade thickness	3.0 mm
Weight	130 g
Blade material	420C stainless steel
Handle material	Pressed leather rings
Guard and pommel	Stainless steel
Sheath	Classic leather sheath (belt carry)
Type	Fixed-blade hunting and outdoor knife

Care & Maintenance

- Clean the blade after use, especially after contact with moisture, blood or acidic substances.
- Dry thoroughly and, if needed, apply a light coat of oil on the blade to maximise corrosion resistance.
- Maintain the edge with a suitable sharpening stone or system; regular light sharpening is better than infrequent heavy grinding.
- Keep the leather handle and sheath dry when possible; if wet, allow them to air-dry away from direct heat sources.

ORDER CONFIRMATION

- Use leather care products occasionally on the sheath to keep the leather supple.

Other Useful Information

The European Hunter series from FOX Knives pays homage to classic European hunting knife designs while using modern stainless steels and manufacturing quality from Maniago, Italy. The moderate blade thickness and traditional leather handle make this model particularly comfortable for extended use compared with many modern tactical designs.

Glossary of Terms

- **Drop point blade:** A blade shape where the spine slopes gently toward the tip, offering a strong point and good control for game processing.
- **Full tang:** A construction where the blade steel runs through the entire handle for strength and durability (typical for quality outdoor knives).
- **420C stainless steel:** A stainless steel commonly used in knives for good corrosion resistance and easy sharpening.
- **Pressed leather rings:** Stacked leather washers compressed around the tang, forming a warm, grippy and traditional handle.

Downloads / Manuals / Extra Info

- Additional product information and care advice available from FOX Knives upon request.
- Check the manufacturer's website for other models in the European Hunter series.
