Description

The new GIP beard comb offers several advantages over the beard brush: it has double-sided teeth - a rough side with 13 teeth and a fine side with 19 teeth. This allows the beard to be combed very well and any knots in the hair are quickly removed. In addition, various care products such as oil or balsam can be ideally incorporated with this comb. The tips of the toothing are correspondingly rounded so that there is no risk of injury.

The GIP beard comb with a length of 8.5 cm and a width of approx. 5.5 cm is very handy. Due to the small thickness of the material of 1 mm it fits into the included transparent check card cover. This allows the comb to be simply taken along and thus becomes a trendy accessory for the self-conscious beard carrier. Hygienic and space-saving for the jacket, the backpack or also for the flight hand luggage.

The unbreakable GIP beard comb made in Germany is made of high-quality stainless steel 18/10, thus also suitable for nickel allergic persons.
