Description

Modern Tactical Plate Carrier vest

The Guardian Plate Carrier is a tactical vest designed to carry ballistic plates. This universal modular construction is for attaching and carrying tactical equipment. Thanks to the elastic panel on the inside of the vest, it can be adjusted to plates of various shapes and thicknesses.

Guardian Plate Carrier - designed for functionality

The Guardian Plate Carrier not only allows for carrying ballistic plates but also, thanks to a modular system compatible with MOLLE/PALS, allows for the attachment of additional equipment directly onto the vest. An internal pocket on the front that fastens with a hook & loop is designed for storing small but essential items. The front flaps are secured with buckles covered by the main fabric, with an evacuation handle on the back. Both front and rear panels feature soft hook & loop strips for insignia of uniformed services. The Guardian Plate Carrier fits the most popular types of plates: E-Cut (SAPI/ESAPI) and Swimmer Cut or Shooter Cut. In Helikon-Tex's offer, you can purchase two sets or each element separately. The Guardian Military set is designed for soldiers, and the Guardian Law Enforcement set is tailored to the needs of police officers and other uniformed services. Which ballistic plates fit into the Guardian Plate Carrier?

Size M: 31.5 x 24.5 cm

Size L: 34 x 26.5 cm

Depending on the manufacturer, the dimensions of ballistic plates may vary. We accept a plate tolerance of up to approx. 1 cm due to the elasticity of the pockets. The Guardian Plate Carrier is compatible, among others, with SAPI standard plates for sizes M and L. Before purchasing, measure your
