Description

KJ Works KP-05 CO₂ 23BB Magazine for KP-17

Replicas

The KJ Works KP-05 magazine is a durable CO₂-powered metal magazine designed specifically for KP-17 airsoft pistol replicas. With a 23 BB capacity and robust construction, it ensures reliable feeding, consistent gas performance, and compatibility with demanding game environments.

Aim of the Product

This magazine is intended to provide stable shooting performance for KP-17 series airsoft pistols. Built from metal and powered by CO₂, it offers strong gas efficiency, dependable pressure output, and reduced cooldown effects compared to green gas magazines.

Audience

- Airsoft players using KJ Works KP-17 replicas
- Competitive and training-focused airsoft users
- Collectors and hobbyists needing spare magazines
- Players who prefer CO₂ for cold-weather performance

ORDER CONFIRMATION

The magazine is loaded from the top or bottom (standard method) and powered by a CO₂ capsule inserted into the internal chamber. Ideal for training, dynamic gameplay, or as a backup magazine for extended sessions.

Specifications & Technical Details

- **Compatibility:** KJ Works KP-17 replicas
- **Capacity:** 23 BBs (low-cap)
- **Caliber:** 6 mm BB
- **Propellent:** CO₂
- **Material:** Metal construction
- **Colour:** Black
- **Weight:** 350 g

Other Useful Information

CO₂ magazines are particularly effective in colder conditions, providing higher and more stable pressure compared to green gas magazines. This makes them suitable for winter games or demanding scenarios where consistent shot velocity is required.

Care & Maintenance

- Apply a small amount of silicone oil to the magazine seal before inserting a CO₂ capsule.
- Do not store the magazine with a full CO₂ cartridge inserted.
- Clean feed lips and BB channel regularly to ensure smooth feeding.
- Avoid dropping the magazine on hard surfaces to prevent valve or frame damage.

Glossary of Terms

- **CO₂ Magazine:** An airsoft magazine powered by compressed carbon dioxide for strong and consistent pressure.
- **Low-cap:** Magazine with realistic, low BB capacity (no winding required).
- **Feed Lips:** The top part of the magazine that holds BBs before entering the chamber.
