Description

LENSOLUX Micro Red-Dot reflex sight with 21.5 mm mounting

This reflex-sight is specifically suitable for situations where spontaneous and instantaneous shooting is required. It allows you to shoot at moving targets even in the smallest field of view. You can keep both eyes open which helps you to aim intuitively at the target.

The illuminated dot of the reticle has a diameter of 2 MOA. 1-fold magnification, view diameter 23.5 x 16.8 mm. On/off switch on the back of the housing for fast operation, adjustable in two brightness levels. The compact housing is 45 mm long and made of sturdy aluminum, matte black coated. With 21.5 mm Weaver mount and black plastic cap that protects the entire housing.

All our optics are tested for <1.5 g. In this way, we guarantee shooting strength for every large ball caliber.

Delivery includes 2 allen keys (for the reticle adjustment, battery replacement), cleaning cloth, spare battery CR 2032 and detailed description.
