Description

The all new LENSOLUX GRAND SERIES 3-12 x 56E - for the night-hunt and for all requirements associated with poor lighting conditions, this riflescope is particularly distinguished.

56 mm lens diameter and 11-way dimmable illuminated fine dot reticle 4 in the second image plane - this does not increase the reticle when the magnification is turned up. This also makes it possible to achieve precise shots on small targets at a greater distance. Many hunters are amazed about the image brightness, contrast and edge sharpness that best characterizes this rifle-scope. It does not have to scare to be compared to other, more expensive riflescopes.

One-piece body with 30 mm diameter of coated and scratch-resistant ALU. A high-quality nitrogen-gas filling prevents internal fogging and makes your scope waterproof. With finely adjustable eyepiece.

All our optics tested shock-proof <1,5 g. In this way, we guarantee shooting strength for every large ball caliber.

Delivery includes fixed 4-screw ALU mounting for 11 mm prism rail (on request we deliver a 21.5 mm Weaver mounting instead of the 11 mm), 2 flip covers, description, cleaning cloth and replacement battery CR 2032
