Description

Swedish FireKnife has a blade of hardened Sandvik 12C27 stainless steel and a handle with a high friction rubber grip which is comfortable, easy and safe to use. Profile-grinding makes the blade fine enough to ease out splinters and the back of knife has been ground to work perfectly with the Swedish FireSteel®. The Swedish FireSteel® is durable (3000 strikes), works equally well when wet and creates a 2,980°C spark.

1. Remove paint on new fire-starter with the back of knife.
2. Pull the back edge of the knife slowly and firmly down length of fire-starter.
3. Sparks easily ignite a stove, TinderDust, BBQ, paper, dry grass, birch bark or any other prepared tinder.

Features:

- Flexible and sturdy profile-grounded blade.
- Sheath with clip.
- High-friction rubber handle.
- Includes an original Swedish FireSteel® firestarter.
- Lights campfires, gas-stoves, gas-barbecues.
- Works equally well when wet.
