Description

Luminox Navy SEAL Steel Diver's 200 m Men's Watch 3251

Luminox Navy SEAL Steel Diver's Watch 3251 is a robust Swiss Made men's watch designed for demanding use in water, low-light environments, and everyday wear. Built with a solid **45 mm stainless steel case** and protected by a **sapphire crystal**, it combines classic diver styling with the unmistakable toughness of the Navy SEAL collection.

At the core of the watch is Luminox's signature **self-powered tritium illumination system**. Tiny sealed light tubes embedded in the hands and indexes glow continuously for up to **25 years**, ensuring perfect readability in darkness, underwater, or in low-visibility conditions – without charging or external power.

The watch is powered by a reliable **Swiss quartz movement** with long battery life (up to 6 years) and offers a practical **date function**. With **200 meters / 20 ATM water resistance**, it is suitable for swimming and diving within recreational limits*, making it a dependable companion both on land and at sea.

FAQ

Does the watch need charging for the luminous display? At daylight exposure or button activation and lasts up to 25 years.

Is this watch suitable for diving? In short, it is suitable for swimming and recreational diving*. Always ensure seals are intact and the crown is properly secured.

What kind of glass does the watch use? Sapphire crystal, offering excellent resistance to scratches.

How long does the battery last? Estimated battery life of up to 6 years under normal use.

Glossary

- **Tritium illumination:** Self-powered light tubes that glow constantly without external energy
- **20 ATM:** Water resistance rating indicating suitability for swimming and diving within limits
- **Sapphire crystal:** Highly scratch-resistant watch glass
