### Description

The felts from Niebling Waffenpflege are ideal for cleaning your weapon with a normal level of dirt. Felts clean the barrel of a gun both easily and quickly as well as gently and thoroughly.

Using the felts is easy. The felts are mounted on a felt holder attached to a cleaning rod and pushed through the barrel. Felts are therefore often bought together with a felt holder. By pushing through the barrel, deposits are picked up by the felt and thus removed from the barrel.

Cleaning with cleaning felts from Niebling Waffenpflege is extremely important in order to remove deposits that contaminate the weapon after each shot. Deposits such as plastic, lead or powder residue can soil the barrel of the gun. Even if this cannot be seen with the naked eye at first, felts, for example, should be used regularly. Every deposit, no matter how small, means a drag that can affect the velocity, spin and ballistics of the bullet.

Suitable for caliber .354 / 9mm.
