Description

Origin Outdoors Firestarter "Flame Slice" (6 pcs.)

Origin Outdoors Firestarter "Flame Slice" is a practical long-burning firelighter made from pressed wood shavings and paraffin wax. It ignites quickly, burns with high heat, and gives you extra time to get your fire going—ideal for campfires, wood stoves, and fireplaces.

Fast ignition with strong, long-lasting flame

The pressed wood chips and paraffin wax formula lights easily and produces a steady, high-temperature burn. This helps ignite even damp or difficult wood, making it especially useful in unpredictable outdoor conditions.

Up to 20 minutes burn time per piece

Each piece burns for up to **20 minutes**, giving you enough time to build a stable flame and properly ignite your fuel. For smaller needs, the firestarter can be **divided** so you can use only what you need.

Great for camping and stoves

Whether you're starting a campfire outdoors, lighting a wood-burning stove, or using a fireplace, Flame Slice offers a simple and reliable way to start a fire without fuss.

Key Features

- Easily ignitable
- Burns with high heat output
- Long burn time: up to 20 minutes per piece
- Divisible for smaller portions
- Ideal for campfires, wood stoves, and fireplaces

Technical Specifications

Material	Wood chips and paraffin wax
Size per piece	Ø 4.0 × 2.2 cm
Weight per piece	Approx. 20 g
Burning time	Up to 20 minutes per piece
Variant	6 pcs.

Safety Warnings

Warning: Not suitable for children under 12 years - highly flammable, risk of fire.

Warning: Keep out of reach of children.

Warning: Do not touch the flame - risk of burns.

Warning: When using, avoid contact of the flame with loose hair, ribbons, fabrics, and other flammable materials.

Warning: Only use outdoors.

FAQ

How long does one Flame Slice firestarter burn? Conditions such as wind and airflow.

Can I break it into smaller parts? so you can use smaller pieces when needed.

Will it help ignite damp wood? which helps get damp or hard-to-ignite wood started more easily than short-burning firelighters.

Is it suitable for wood stoves, and fireplaces? stoves, and fireplaces. Always follow local fire safety rules.

Glossary

- **Firestarter / Firelighter:** A product designed to help ignite wood or charcoal more easily and reliably
- **Paraffin wax:** A flammable wax used to extend burn time and stabilize the flame
- **Wood shavings:** Small pieces of wood that ignite easily and help transfer flame to larger fuel
