### Description

#### Origin Outdoors Firestarter "Magnesium"

Origin Outdoors Firestarter "Magnesium" is a simple, reliable, and waterproof fire-starting tool designed for camping, trekking, and survival use. Made from nearly pure magnesium, it provides dependable ignition even in demanding outdoor conditions.

#### Reliable Fire Starting in the Outdoors

This magnesium firestarter works by shaving small magnesium flakes from the rod and igniting them with a match, lighter, or suitable kindling. Magnesium burns extremely hot, making it effective even in damp or windy environments.

#### Durable and Waterproof Design

The solid magnesium rod is fully waterproof and resistant to weather exposure. With no moving parts and no fuel that can leak or evaporate, it is a dependable addition to any survival kit or outdoor equipment setup.

#### Ideal for Camping, Trekking and Survival

Compact and lightweight, the firestarter is easy to carry in a backpack, emergency kit, or bushcraft pouch. Its simplicity makes it suitable for both experienced outdoorsmen and those assembling basic emergency gear.

## ORDER CONFIRMATION

- Durable and weather-resistant construction
- Fully waterproof
- Extremely hot-burning magnesium
- Simple, reliable fire-starting method
- Ideal for camping, trekking, and survival use

## Technical Specifications

|                  |                  |
|------------------|------------------|
| Material         | 99.99% Magnesium |
| Dimensions       | Ø 14 × 90 mm     |
| Water Resistance | Waterproof       |

## Safety Warnings

Warning: Not suitable for children under 12 years – risk of fire.

Warning: Highly flammable material – handle with care.

Warning: Keep out of reach of children.

Warning: Use only outdoors.

Warning: Magnesium burns at extremely high temperatures – avoid skin contact and flammable materials.

## FAQ

**How does a magnesium firestarter work?** A magnesium rod and ignite them with a match, lighter, or spark. Magnesium burns very hot and ignites tinder easily.

**Can it be used in wet conditions?** Yes, it is waterproof, and magnesium burns reliably even in damp environments.

**Does it work without a lighter or matches?** Yes, it can be ignited using a spark, match, or lighter. It is often combined with a fire steel in survival kits.

**Is this suitable for survival kits?** Yes, its high ignition temperature and durability make it well suited for emergency and survival equipment.

## Glossary

- **Magnesium Firestarter:** A fire-starting tool that uses magnesium shavings as a highly flammable ignition material
- **Tinder:** Easily ignitable material used to start a fire
- **Survival Gear:** Equipment designed to support basic needs such as fire, shelter, and water in emergency situations
