Description

Origin Outdoors Folding Alu Windshield - Fuel-Saving Stove Wind Shield

The **Origin Outdoors Folding Aluminium Windshield** is a lightweight and practical accessory for outdoor cooking. Designed to protect your stove or grill from wind, it significantly improves **heat efficiency, fuel economy, and cooking safety** in outdoor conditions.

By shielding the flame from wind, the windshield helps maintain stable combustion, allowing faster heating and longer burn times. In many situations, especially in exposed terrain, cooking is only possible with a proper windscreen.

Aim of the Product

This windshield is designed to optimize outdoor cooking by reducing heat loss caused by wind, saving fuel and improving overall safety when using camping stoves or grills.

Audience

- Campers and hikers
- Bushcraft and outdoor cooking enthusiasts
- Backpackers looking to save fuel
- Users of gas, alcohol, or solid-fuel stoves

ORDER CONFIRMATION

- Outdoor travelers cooking in windy environments

Key Benefits

- Reduces wind impact on stove flame
- Saves fuel and increases burn efficiency
- Improves heating output and cooking time
- Enhances safety during outdoor cooking
- Lightweight aluminium construction
- Foldable and easy to transport
- Includes pins for securing in windy conditions

Available Sizes

Version 1 – Compact

- **Weight:** 170 g
- **Dimensions:** 49 × 26 cm
- **Number of slats:** 5

Version 2 – Extended

- **Weight:** 260 g
- **Dimensions:** 78 × 26 cm
- **Number of slats:** 8

Usage Notes

- Place the windshield around the stove with sufficient airflow
- Secure the ends using pins in strong wind conditions
- Always place the stove on a stable, fireproof surface
- Never fully enclose a stove to avoid overheating

FAQ

Does this windshield work with all camping stoves? Yes, it works with all gas and liquid-fuel stoves, as well as small grills.

Does it really save fuel? Yes, due to the protection caused by wind, the stove reaches cooking temperature faster and burns more efficiently.

Is it stable in strong wind? Yes, it is designed for securing it to the ground, improving stability in gusty conditions.

Glossary

- **Windshield / Windscreen:** A barrier used to protect a stove flame from wind.
- **Heat Efficiency:** The effective use of generated heat for cooking.
