Description

Very light and efficient rocket stove of robust all-metal construction. Thanks to its design, it has a high degree of stability and effectively combines the fireplace effect and the wood carburettor principle. The housing has a heat-resistant powder coating and the burner pot is made of stainless steel. The top section can accommodate e.g. fire pots, cast-iron and wrought-iron pans. The rack for the logs can be installed and removed in no time at all. Various materials such as wood, barbecue charcoal, wood pellets or branches can be used for firing. The efficient combustion with low consumption of fuel is perfect for the outdoor kitchen.

- very light and robust
- high stability
- quickly ready for use
- can be fueled with different materials
- Weight 2.760 g
- stainless steel and sheet iron
- 34 x 38 x 27 cm
- pot support Ø 29 cm

Brand country - Germany.
