Description

PELI 1630 Protector Transport Case

The Peli 1630 Protector Transport Case is a heavy-duty wheeled equipment case designed to protect sensitive gear in the harshest environments. Since 1976, Peli Protector Cases have been trusted to safeguard equipment from arctic cold, desert heat and demanding transport conditions. The 1630 model offers a large interior volume, crushproof and dustproof construction, and full IP67 protection.

Made in the USA, the case features an automatic purge valve to equalize internal air pressure, a watertight silicone O-ring seal, stainless steel hardware and over-molded rubber handles. Four strong polyurethane wheels with stainless steel bearings and a retractable trolley handle make it easy to move even when fully loaded.

Aim of the Product

The Peli 1630 is designed to provide maximum protection and transport capability for sensitive equipment such as electronics, optics, instruments, weapons systems, UAV components or camera gear. It combines impact resistance, watertight sealing and convenient mobility for professional users who cannot risk equipment failure due to damage in transit.

Audience

This case is ideal for:

ORDER CONFIRMATION

- Military and law-enforcement units deploying mission-critical equipment.
- Industrial, offshore and field service teams.
- Film, photo and broadcasting professionals transporting heavy kit.
- Emergency services and rescue organizations.
- Anyone needing a large, certified transport case for valuable and fragile gear.

Product Use

The 1630 Protector Case is intended for transporting and storing equipment that must remain protected from impact, dust and water. The case includes three layers of Pick N Pluck foam and convoluted lid foam, allowing users to customize a snug fit around their specific equipment. Easy open double-throw latches ensure secure closure while remaining quick to operate, even with gloves.

The retractable extension handle and four polyurethane wheels with stainless steel bearings provide smooth rolling over various surfaces. Reinforced corners, solid wall design with open cell core and stainless steel padlock protectors add to impact resistance and security.

Package Contents

- Peli 1630 Protector Transport Case
- Three-level Pick N Pluck foam set
- Convoluted (egg-crate) lid foam

Compatibility

- Suitable for a wide range of professional equipment: cameras, lenses, drones, instruments, weapons, tools and electronics.
- Meets IP67 and Def Stan 81-41 requirements for protection and durability.
- Designed to work with standard padlocks (padlock holes with stainless steel protectors, 0.8 cm diameter).

Specifications and Technical Details

Dimensions

Measurement	Value
Interior (L × W × D)	70.4 × 53.3 × 39.4 cm
Exterior (L × W × D)	79.5 × 61.5 × 44.4 cm
Lid depth	8.3 cm
Bottom depth	30.8 cm
Total depth	39.1 cm
Internal volume	0.148 m ³
Padlock hole diameter	0.8 cm

Weights & Buoyancy

Parameter	Value
Weight with foam	16.3 kg

ORDER CONFIRMATION

Weight empty	14.1 kg
Buoyancy (maximum load afloat)	158.8 kg

Materials

Component	Material
Body	Polypropylene
Latches	ABS
O-ring	Polymer
Pins	Stainless steel
Foam	Polyurethane (approx. 1.3 lb density)
Purge valve body	ABS
Purge vent	3 micron hydrophobic non-woven material

Temperatures

Parameter	Value
Minimum temperature	-40 °F (-40 °C)
Maximum temperature	190 °F (88 °C)

Other Features

- Watertight, crushproof and dustproof construction.
- Open cell core with solid wall design - strong yet lightweight.
- Automatic pressure equalization valve - balances interior pressure and keeps water out.
- O-ring lid seal.
- 4 strong polyurethane wheels with stainless steel bearings (wheel diameter 5.3 cm).
- Retractable extension trolley handle.
- Fold-down side handles.
- Stainless steel padlock protectors.
- Stackable design and reinforced corners.
- Easy open double-throw latches.
- Peli's legendary lifetime guarantee (where applicable by law).

Care and Maintenance

- Rinse with fresh water after exposure to salt, sand or chemicals.
- Inspect the O-ring regularly and keep it clean to maintain watertight performance.
- Check wheels and handles for debris and clean as needed.
- Do not exceed the buoyancy rating when using the case on water.

Regulations & Standards

- **IP67** - dust tight and protected against temporary immersion in water.
- **Def Stan 81-41** - UK Ministry of Defence standard for protective cases.
- **ATA 300** - Air Transport Association specification for reusable containers.

ORDER CONFIRMATION

- **MIL C 4150J** - US military specification for watertight, reusable containers.
- **MIL STD 810G Fungus Test** - tested for resistance to fungal growth.

Other Useful Information

The 1630 is part of the Peli Protector Case family, recognized worldwide for reliability and long service life. Its large interior volume and wheeled base make it suitable for heavy setups that would be difficult to carry in smaller hand-only cases. For custom foam requirements, additional foam inserts or dividers can be ordered separately.

Note: Please consult a sales specialist for specific application questions or custom configurations.

Glossary of Terms

- **Pick N Pluck foam:** Pre-scored foam that can be easily shaped to fit equipment by hand.
- **IP67:** Ingress protection rating indicating complete dust protection and protection against immersion up to 1 m for a limited time.
- **Automatic purge valve:** Valve that equalizes internal case pressure while keeping water out.
- **ATA 300:** Standard defining performance of airline-transport containers.

Lynxgear - Official PELI Partner

Lynxgear (LATLYNX SIA) is an official member of the PELI Authorized Partner Program. This status ensures:

- direct access to PELI technical support and warranty services,
- guaranteed authenticity of all PELI products sold by Lynxgear,
- priority handling of warranty claims through official PELI channels,
- up-to-date product information and certified documentation.

Buying a PELI case from Lynxgear means receiving the full manufacturer-backed warranty and service support provided by PELI Products.
