Description

Absolute novelty! Safety razor with side-closed head!

It is a well-known problem in particular refuse to use a safety razor because of the blades sticking out to the side in their heads. Despite the fact that this property of a safety razor head does not pose any danger, it is still viewed critically over and over again.

With our new safety razor head, the side ends of the blade are now covered in a modern and elegant way. A definitely unique new development. The head is manufactured using the zinc die-casting process and is lavishly chrome-plated. He shaves gently, as gently and cleanly as possible. Suitable for facial shaving (of course also for body shaving, leg shaving etc.). The traditional mechanism with a closed comb allows the razor blade to be changed quickly and safely. Perfect contours for sideburns or at the base of the beard are no longer a problem. This easy-to-handle model with a matt-brushed, 9 cm long handle with a black anodized middle section is a small marvel of precision. Suitable for all common safety razor blades. Delivery in a gift box! Made in Solingen.

The experienced user knows the shaving experience as wellness - gentle, clean and safe shaving thanks to the ideal position of the blade in the closed comb of the razor, very good foam and cut hair removal.

Weight: about 70g
