Description

Reliance TraumaFix Tactical Trauma Dressing - 20 × 19 cm

The **Reliance TraumaFix Tactical Trauma Dressing** is a sterile, single-use **medical device** designed for rapid control of **severe external bleeding**. It combines a large wound dressing with an integrated **pressure pad** and elastic bandage, allowing effective compression in emergency situations. Developed for use in demanding environments, this tactical version features **waterproof packaging** and a camouflage design, making it suitable for military, law enforcement and outdoor use.

Key Features

- **Integrated pressure pad** for effective hemorrhage control
- **Elastic bandage** for secure compression
- **Hooped tail** for one-handed application
- **Anti-unravel system** with hook-and-loop fixation

ORDER CONFIRMATION

- **Vacuum-packed sterile dressing**
- **Waterproof outer packaging**
- **Camouflage design** for tactical environments

Design and Functionality

The TraumaFix dressing combines a large sterile wound pad (20 × 19 cm) with a durable elastic bandage. The integrated **pressure pad** increases localized compression to help control heavy bleeding.

The **hooped tail** allows for fast and intuitive application, including self-application in high-stress conditions. Hook-and-loop elements prevent the bandage from loosening during use, ensuring consistent pressure even when the casualty is being moved.

The dressing is vacuum sealed in **water-resistant packaging**, protecting it from environmental factors and ensuring readiness in demanding field conditions.

Applications

- Severe bleeding and traumatic injuries
- First aid kits and IFAKs
- Military and tactical use
- Law enforcement and security
- Outdoor and remote environments

Specifications

Dressing Size	20 × 19 cm
Type	Pressure trauma dressing
Sterility	Sterile, single use
Packaging	Vacuum sealed, waterproof outer layer
Application	One-handed possible

Important Information

This is a **single-use sterile medical device**. Improper use may result in ineffective bleeding control. Training in first aid or trauma care is recommended.

FAQ

What is the purpose of this dressing? Control bleeding by applying direct pressure to the wound.

Can it be applied with one hand? Yes, for one-handed application, which is important in self-aid situations.

Is it reusable? No, it is a sterile, single-use medical device.

Is it suitable for tactical environments? Yes, its camouflage design makes it suitable for field use.

Glossary

- **Pressure dressing:** A bandage designed to apply compression to control bleeding.
- **Hemorrhage:** Severe or uncontrolled bleeding.
- **IFAK:** Individual First Aid Kit.
