from Snugpak is a sleeping bag
with center zipper, for
temperatures above freezing

Description

The Special Forces 1 from Snugpak is a sleeping bag for temperatures above freezing. It has an incredibly light and small pack size, with a size of only about 16 x 16 cm when fully compressed. The Special Forces 1 offers all the benefits of the Softie range. The Softie® Premier filling combines the benefits of natural down with the insensitivity of synthetic fiber. It uses superfine yarns bonded with special resins to create a luxurious down feel. As a result, the synthetic fiber meets the very highest standards. Even in cold and wet weather, Softie® Premier insulation remains warm, lightweight and breathable. The wind and water repellent Paratex Steelplate outer material and Softie® Premier filling, make the sleeping bag insensitive to moisture. To speed up the warming of the sleeping bag, an additional layer of Reflectatherm is sewn in. Reflectatherm is a metallized, highly breathable fabric sewn between the inner fabric and the Softie® Premier filling. It reflects the heat radiation emitted by the body, achieving up to 15% better heat retention. A zipper with full-length insulated zipper cover; A mummy shape for warmth and comfort and a quilted, close-fitting hood with adjustable cord. All this ensures a comfortable night's rest, even when the temperature drops. The Softie 3 Merlin is durable, breathable and water repellent, it is incredibly lightweight and compresses small. Snugpak's Special Forces 2 sleeping bag can be used on its own or combined

with the Special Forces 1 to create a sleeping bag for temperatures as low as -15°C

Temperature range Comfort: 5°C.*

Temperature Range Limit: 0°C.*

Details:

- Robust and windproof Paratex Steelplate outer fabric with high breathability (12 liters per m² per 24 h).
- Soft and very light Paratex Light lining with high breathability (12 liters per m² per 24 h).
- Reinforced foot area - so strong that you can even sleep with boots on.
- Centered 2-way zipper for optimal sleeping bag ventilation.
- Insulation-filled inner zipper cover to prevent cold bridges along the zipper.
- Snugfit hood, pleated and drawcorded so it pulls into shape like a jacket hood.
- Ticking attachment and hanging tabs.
- Compression sack included.

Length: 220 cm (suitable for body length up to 205 cm).

Width (chest area): 80 cm.

Width (foot area): 42 cm.

Pack size: approx. 16 x 16 cm.

Weight: approx. 1200 g.

Made in the UK.

*Snugpak temperature ratings are based on over 40 years of experience and customer feedback. The comfort value assumes you are sleeping in a tent on a high quality sleeping mat lightly clothed. At this outdoor temperature, the majority of users should feel comfortable and sleep well.

The low temperature values are the temperatures at which sleeping bags were used by people with minimal discomfort.

There are many variables that are important to a good night's sleep, including climate, altitude, fitness, and metabolism.

How to pack sleeping bag:
