### Description

#### **Suunto MC-2 G Professional Sighting Compass with Mirror**

The **Suunto MC-2 G** is a top-of-the-line mirror compass designed for professional and recreational mountaineers who require precise direction and slope measurement in challenging terrain. Crafted in Finland with **Suunto's globally balanced needle**, this compass will reliably perform anywhere on Earth.

#### **Key Features**

- **Globally Balanced Needle:** Special construction allows the needle to tilt independently, ensuring accurate readings in both hemispheres.
- **20° Tilt Margin:** Easier, more forgiving readings when the compass isn't perfectly level.
- **Mirror for Sighting Bearings:** Ensures precise direction finding; also useful for signaling in emergencies.
- **Clinometer:** Built-in gauge to measure slope angles – especially helpful in mountainous terrain.
- **Adjustable Declination Correction:** Fine-tune for the difference between magnetic north and true north.
- **Luminescent Markings:** Makes low-light or night navigation possible without external light sources.
