Description

The Taidea TG1704 sharpener is a highly efficient and easy-to-use electric diamond sharpener that will precisely sharpen or repair the cutting edges of neglected kitchen knives and EDC knives in minutes. No prior knowledge and skills are required to use this sharpener. A functional, practical and safe sharpener with a special place for the palm. It also has a non-slip base with a built-in magnet to prevent the sharpener from slipping. The 35 W motor can be turned on and off with 1 button. It has fixed, predetermined sharpening angles that make the sharpening process much easier. The user only needs to apply even pressure when driving the blade. Depending on the condition of the blade, the user can choose between graduations 600 and 1000, and angles 1 and 2. The angles marked 1 (gradation 600) are intended for sharpening ceramic knives and very dull cutting edges. Group no. 2 (1000 gradation) is used for smoothing the blade and for quick sharpening.

Brand	GRINDER
Name	Diamond electric knife sharpener
Applicable knives	Ceramic Knives, Chinese knives, Japanese knives, European knives, Damascus knives
Grinding Material	Diamond
Item size	232*95*87mm
Item Net Weight	1100g
