Product name	Tasmanian Tiger TT 2 SGL Mag Pouch
Magazine type	BEL MKIII G36 Magazine Pouch G36, PMAG, AR15 / STANAG-class rifle magazines
Capacity	2 magazines (side by side)
Dimensions (W × H × D)	13 × 16.5 × 3.5 cm
Weight	Approx. 122 g
Main material	CORDURA® 700 den, 100% polyamide
Attachment	MOLLE reverse system, requires 4 MOLLE loops
Front	Laser-cut MOLLE for stacking additional pouches
Retention	Elastic bungee cord with 3D polymer pull tabs
Reinforcement	Funnel-shaped plastic side inserts for easier loading and shape stability

Care and Maintenance

- Brush off loose dirt and dust with a soft brush after use.
- For heavier soiling, rinse with lukewarm water and use a mild detergent if necessary.
- Do not use bleach, aggressive solvents or fabric softeners, as they may damage the CORDURA® fibers and webbing.

ORDER CONFIRMATION

- Allow the pouch to air dry fully in a shaded, well-ventilated area; do not tumble dry and do not expose to direct heat sources such as radiators or open flames.
- Store dry and away from prolonged direct sunlight or sharp objects that could damage the fabric.
- Periodically inspect stitching, MOLLE straps and bungee cords and replace the pouch if critical damage or excessive wear is observed.

Regulations and Standards

The standard TT 2 SGL Mag Pouch BEL MKIII is a textile magazine pouch and is not a ballistic or protective item, so it is generally not certified as PPE. Some IRR (infrared-reduced) variants of Tasmanian Tiger pouches are manufactured according to Bundeswehr technical delivery conditions (for example TL 8305-0278 / TL 8305-0281) for camouflage in the infrared range. Always check the specific product variant description if IRR compliance or particular military standards are required.

Other Useful Information

Tasmanian Tiger is known for professional-grade tactical equipment designed for military, police and security forces. The BEL MKIII revision of this pouch optimizes handling through improved funnel-shaped side reinforcements and ergonomically shaped 3D polymer pull tabs. The three-layer construction keeps the pouch dimensionally stable, making magazine insertion more intuitive, especially under stress or in low-visibility conditions. The modular front with laser-cut MOLLE allows stacking of smaller pouches or accessories, enabling users to tailor their loadout to mission requirements while keeping the overall profile compact.

Glossary of Terms

- **G36:** A 5.56×45 mm NATO assault rifle platform used by various armed forces; its magazines have a distinctive shape and coupling lugs.
- **AR15 / STANAG magazine:** Standardized 5.56×45 mm rifle magazine type commonly used in AR15 and many other rifle platforms.
- **PMAG:** A family of polymer rifle magazines produced by Magpul, widely used as an alternative to standard metal magazines.
- **MOLLE:** Modular Lightweight Load-carrying Equipment – a webbing system that allows pouches and accessories to be attached securely to vests, belts, packs and platforms.
- **CORDURA® 700 den:** A durable, abrasion-resistant polyamide fabric with a yarn thickness of 700 denier, balancing strength and weight.
- **IRR (Infrared-Reduced):** Material treatment designed to reduce the visibility of equipment in the near-infrared spectrum when viewed with night vision devices.
- **3D polymer mag pull tabs:** Shaped pull tabs made from polymer that give a secure grip and make it easier to clear the bungee cord and access the magazine.
