Trigalight® Illumination Technology

Trigalight® is a revolutionary Swiss illumination system developed by mb-microtec ag. It uses tritium gas-filled glass tubes that emit a constant, self-sustaining glow for more than 10 years. Unlike traditional lume, it doesn't need light exposure or batteries, ensuring 24/7 visibility in darkness, underwater, or combat conditions.

Advantages of Traser Watches

- **Swiss Made:** Produced in Switzerland by mb-microtec ag with precision and care.
- **Always Visible:** Constant illumination via Trigalight® technology.
- **High Durability:** Resistant to shock, scratches, and water immersion.
- **Professional Reliability:** Used by tactical units, divers, and outdoor specialists worldwide.

Glossary

- **Trigalight®:** Tritium-based self-luminous illumination system glowing continuously for over 10 years.
- **PVD Coating:** A protective black layer applied through physical vapor deposition for extra hardness.
- **Quartz Movement:** Battery-powered timekeeping using a vibrating quartz crystal for high accuracy.
- **Sapphire Crystal:** Synthetic sapphire glass, extremely resistant to scratches and impact.
- **ATM:** Unit of pressure used to define water resistance. 20 ATM equals 200 meters.
