Description

The Vega Holster Bungy Equipment Series Universal Pistol Holster is one of the most versatile pistol holsters on the market, and the only universal holster with solid construction. Hard holsters are always safer to use - less chance of the gun breaking off, and less chance of the gun falling out.

It is made of durable injection-molded polymer and has a rubber coating that prevents scratches to the gun and the holster itself, extending its life.

The force with which the holster holds the gun can be adjusted by a flexible rubber mesh system throughout the holster. This system is easy to repair and also allows you to adjust how easily the gun can be inserted and removed.

The size of the holster allows it to be used with most pistols on the market.

In addition to safety, a safety cord loop is incorporated, which can be placed on the pistol grip. In this way, the operator can run safely. At times when it is known that the gun may need to be used, this safety line is easy to remove.

The holster can be worn on a trouser belt up to 5 cm high, as well as on
